# The scale and pace of change

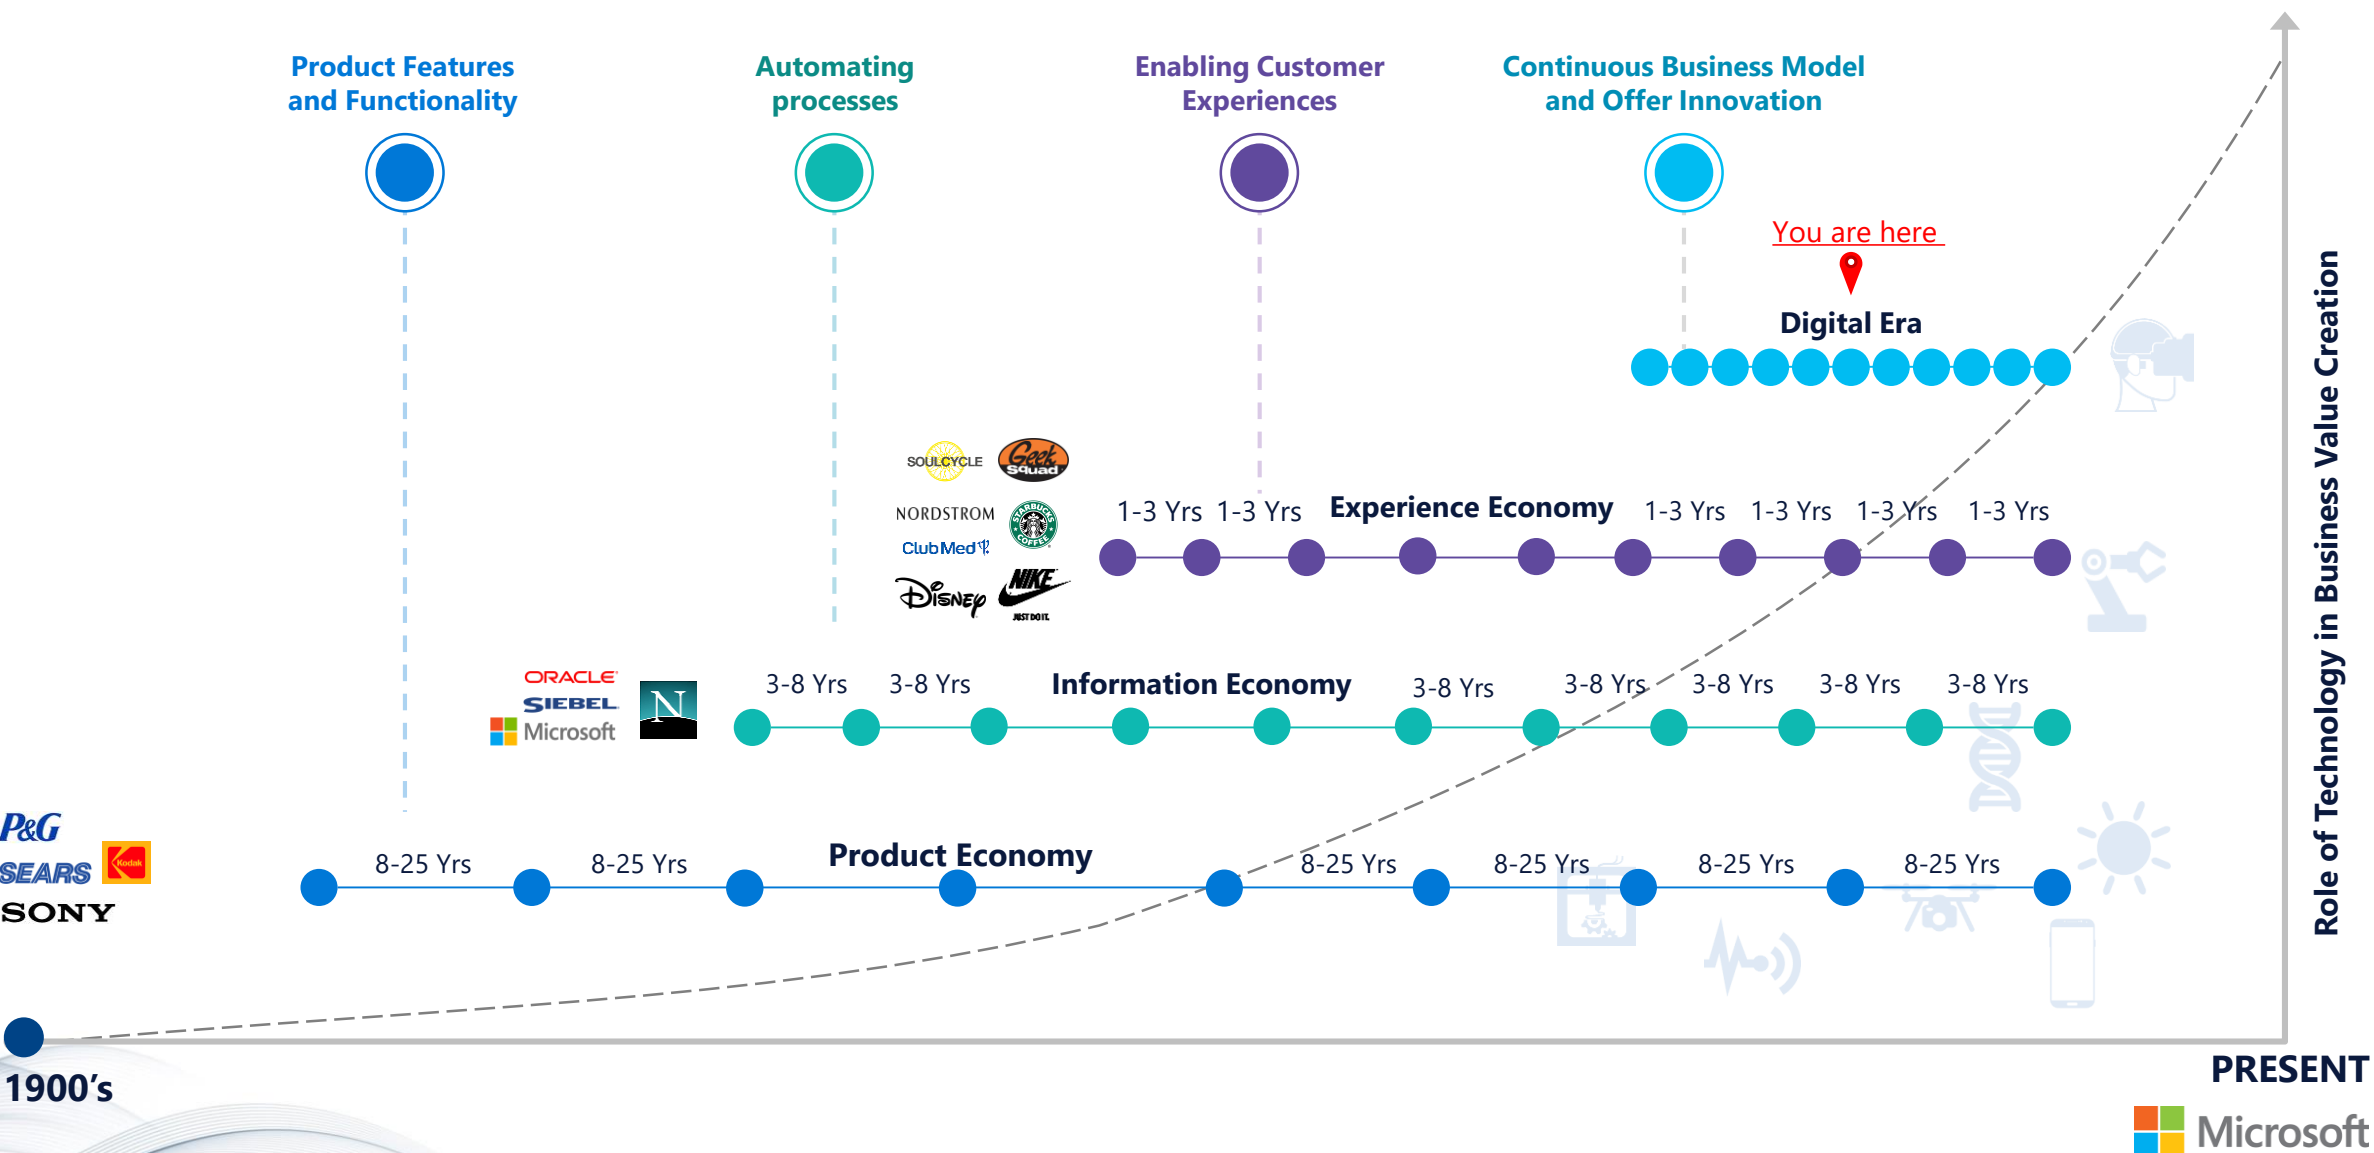

An astonishing pace of change is accelerating transformation. Technology is more affordable and accessible than ever before.

	Drones	2007	\$100,000
		2013	\$700
	3D Printing	2007	\$40,000
		2014	\$100
	Industrial Robots	2007	\$550,000
		2014	\$20,000
	DNA	2000	\$2.7bn
		2007	\$10m
		2014	\$1,000
	Solar	1984	\$30
		2014	\$0.16
	Sensor (3D)	2009	\$30,000
		2014	\$80
	Smartphones	2007	\$499
		2015	\$30

# Business Value Creation

# Achieve digital excellence with connected products and services

Smart product  
innovation

Plants and supply  
chains of the  
future

Connected  
marketing, sales,  
and services

IoT enabling rich  
connected Customer  
experiences

Pervasive connectivity  
enabling new offerings  
and revenue

## CONNECTED VALUE NETWORKS

Transforming how products are designed,  
manufactured, and sold

## CONNECTED SERVICES AND EXPERIENCES

Creating new business models  
as a service provider

# PRODUCTS ARE TRANSFORMING

Smart | Connected | Interoperable | Product as a Service

FACTORIES ARE BEING REVOLUTIONIZED  
Industry 4.0 | Smart MFG | China 2025 | 3D Printing

OPERATIONS ARE BECOMING MORE EFFICIENT  
Smart Operations | Smart Settings | System of Systems

SERVICE IS TRANSFORMING  
Mixed Reality | Remote Service | Predictive Analytics

## Artificial Intelligence and Formula One: AI-Bots on pole position in the race for technology

"We have around 200 sensors on our car. As soon as it is running on the track, those sensors send data through thousands of channels.

Instead of having so many engineers looking at those thousands of channels, we want something like an AI engine behind the scenes, looking at the combined behavior between channels.

We need help to take the best decisions that have to be taken during each lap time."

— Pierre d'Imbleval, CIO,

Renault Sport Formula One Team

Est. FY17 Number of Retail and  
Commercial Sales Orders

2.0M+  
Est. FY17 Deliveries

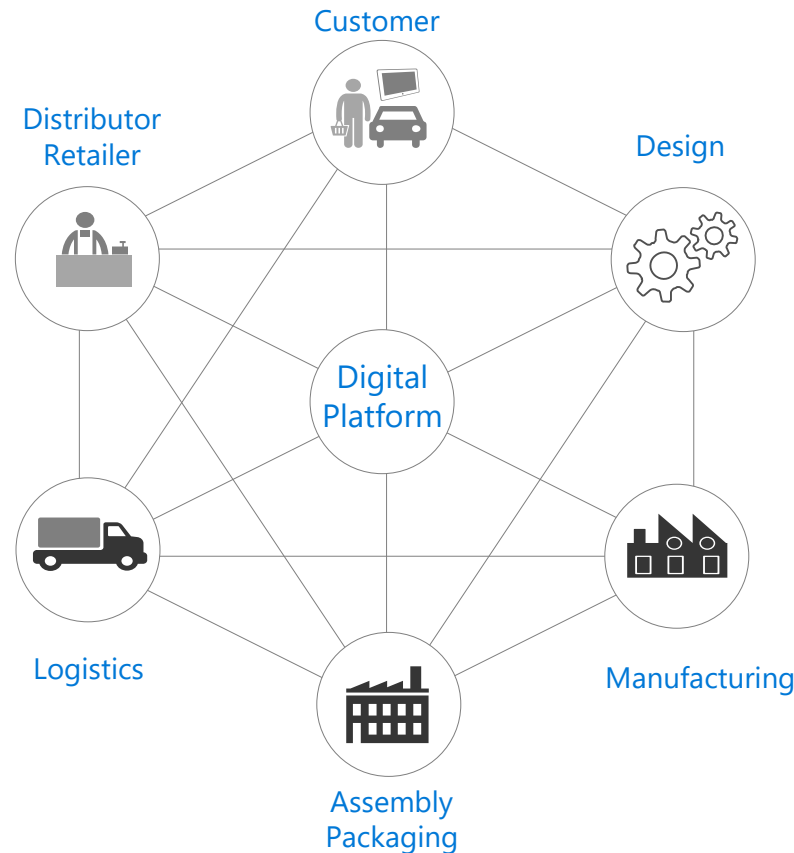

122  
Countries Served

1.3M  
Ship To Locations

# Microsoft's Approach to Digital Supply Chain

**Build** digital supply chain foundation. Leverage the cloud to connect, automate, visualize E2E view of business

**Interconnected. Aligned.**

**Leverage** Big Data solutions to drive predictability, accuracy, reliability and stability in supply chain

**Excellence. Smarter.**

**Drive** agility, responsiveness and flexibility in developing disruptive capability and new business model.

**Intelligent. Empowered.**

# Salvagnini

## Digital Evolution

*" L'esperienza nell'utilizzo del prodotto diviene a tendere l'elemento di forte differenziazione. Non basta un prodotto di eccellenza; serve creare le condizioni affinché l'utilizzo del prodotto sia "quello giusto", con il miglior risultato possibile in termini di efficienza produttiva per il cliente."*

*" Siamo partiti con l'obiettivo di estrarre valore dai dati, di poter osservare tutte le variabili del processo produttivo intorno alla nostra tecnologia. L'essere connessi, grazie a Microsoft, ci ha rapidamente portato a voler comunicare in maniera nuova con il cliente, cercando di garantirgli supporto costante durante tutto il ciclo di vita post-vendita del prodotto. "*

— Roberto Franchini,  
Digital Innovation Manager  
Salvagnini Group

# Bühler reduces waste and increases food safety with cloud and AI

“We’re not only going to get economic results, but hopefully we can transform and save lives at the same time. It’s the most exciting and valuable project I’ve worked on in my 40 years with the company. It’s a really big thing.”

— **Stuart Bashford**, Digital Officer, Bühler AG

## Valorizing enterprise collective knowledge – AI driven Chatbot

---

Train AI to think like a Chem engineer. Employees anywhere in the world could access in real time 30+ years of expertise in Chem manufacturing and locate technical data to make quicker, smarter and more fact-based decision by asking the AI driven chatbot questions in natural language.

By ingesting millions of files, decision logs and technical evaluations from across the company, the AI driven Chatbot can fully leverage and share the potential of the company collective knowledge.

# ENI Intelligent Knowledge Management Platform

Delivering an engaging experience which creates more involvement for knowledge owners is critical to support Eni sharing and “learning through others” strategy, facilitating new hires ramp-up and engineering discussion on project management.

- Full end-to-end Knowledge management solution on based on AI-enabled services to maximize knowledge creation, retrieval and sharing
- The platform will be the only collection point for multi format knowledge data (webinar, papers, social conversations, innovation challenges)
- It will represent the starting point for new learning paths and ML-suggested classes to fully define the tomorrow-employee profile
- The solution will enable new search patterns through natural language and speech-to-text in app

You don't have to  
run ( your business )  
faster, you have to  
change the way you  
run ( your business )

**Thank  
You.**
